

Your In-Home Hospice Care Experts

The majority of Americans want to die at home, but every year, nearly 73% die in medical facilities.

More than 93% of Kansas Hospice Care's patients spend their last days at home. That's almost twice the national average for hospice patients.

We do this by:

- Fewer patients per nurse
- Personalized care plans
- Our nurses average nearly 15 years experience
- Advanced training in wound care
- Advanced training in pain management
- Prescriptions delivered right to your door
- Unlimited nutritional supplements
- Unlimited incontinence supplies
